### How to use these Release Notes

The release notes are organized by solution area. The UC identifier refers to a specific Use Case within the AssetOptics software development lifecycle (SDLC). An explanation of the Use Case and delivered functionality follow. If there are any configuration requirements, they will be listed in the Setup Requirements following the use case explanation. The setup requirements should be used by your system administrator to plan and execute the AssetOptics managed package upgrade.

#### Purchasing

##### **UC-0469    Deprecate Process Builder Flows for POs**
